

Summary

With the completion of the U.S. showroom we have the capacity to host events to boost our profile and develop our business Interests, Want to develop an interface in MSX that will allow us to manage Invites and RSVPs to events.

Invitee Database (Event Invitees)

Mockup:

The mockup shows the 'Event Invitee Database' interface. On the left is a dark sidebar with the MSX v.3.18.0 logo and a search bar. Below the search bar are navigation links: Advanced Search, Inventory, Jewelry Settings, Showroom (with a dropdown menu containing Appointments, Showroom Trays, Showroom Statistics, Showroom Events, and Event Invites), Orders, Shipping, Users, API Requests, Manage, Tools, Ebay, and 47th Management. At the bottom of the sidebar are links for My Account and Log out. The main content area has a title 'Event Invitee Database' and a filter section with 'Filter By:' and dropdowns for 'Type' and 'Company'. Below the filter is a pagination bar showing 'Page: 1' and '1 - 25 out of 939'. An 'Add New' button is in the top right. The central part is a table with columns: Name, Company (if Relevant), Type, Email, Address, Phone, and View/Edit or Delete. The table contains 10 rows of placeholder data. Each row has two buttons in the 'View/Edit or Delete' column: a green 'View' button and a red 'Delete' button. At the bottom left of the main area is the copyright notice 'Copyright Natural Sapphire Company © 2016'.

The mockup shows the 'Add Invitee' form. On the left is the same sidebar as the previous mockup. The main content area has a title 'Add Invitee'. The form contains fields for: Full Name, Type (dropdown), Company (if Relevant), Phone Number, Email, Address, and State (dropdown). A green 'Save' button is at the bottom right. There are three text boxes with arrows pointing to the form: 1. 'There may be a need for an interface allowing connecting existing Customers and Vendors to be Invitees' (points to the Company field). 2. 'Additionally; new additions to Vendors for NY should auto-add to the invitee list.' (points to the Company field). 3. 'Form for adding New Invitees to the DB manually' (points to the Save button). At the bottom left of the main area is the copyright notice 'Copyright Natural Sapphire Company © 2016'.

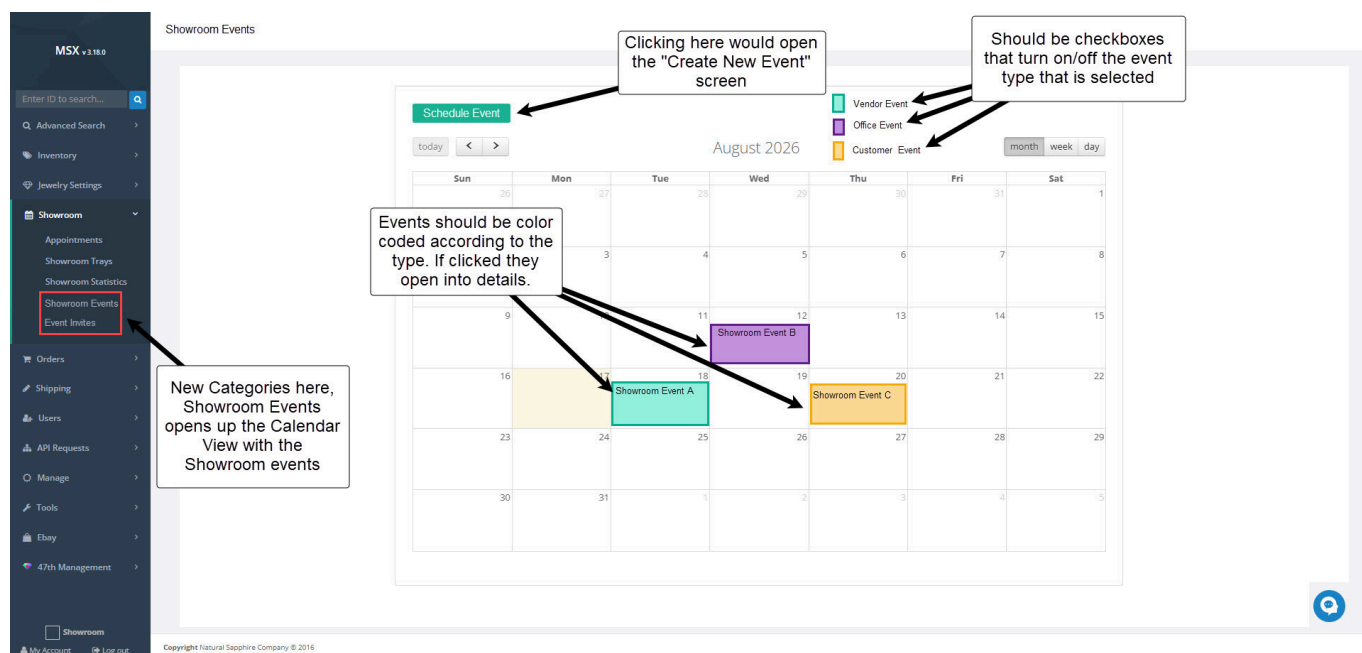

This is where we keep track of the contact info for all potential invitees as well as add new invitees. There should be auto-population from various places (Vendors, Customers w/ Accounts, Office Employees) and have the ability to add other potential Invitees.

Invitee Object Structure:

Name
 Company (Not Mandatory)
 Email
 Phone (Not Mandatory)
 Type
 Address (Not Mandatory)

Events Calendar

Mockup:

As shown in the below mockup; the Calendar View is a means of viewing, Month by Month what events are scheduled when. From here there will be a button "New Event" That will open to a creation screen. Additionally there will be 3 categories of events

- *Vendor/Trade Events:* These events will be limited to our existing vendors or people who are in the jewelry business that we may like to grow relations with.
- *Office Events:* These are events that are limited to employees of the Natural Sapphire Company and close guests/family. This could be open to events that select employees have requested the showroom for
- *Customer Events:* These are events that have a wider scope and will be open to customers of NXC and invites can be sent to those customers who've created accounts on the NXC Website and opted in to getting invites

Create New Event

Mockup:

MSX v3.18.0

Create New Showroom Event

Can select where in the showroom the event is being held

Name: Type: Date: 08/20/2026 Time:

Invitation Email: Location: RSVP By Date: 08/20/2026

Drag and drop to upload or [Select File \(HTML or JPG\)](#)

Simple Desc.:

Save and Select Invitees

Form to fill out with the Event Details, Required Fields: Name, Type, Date, RSVP By Date

Once this is selected should navigate to a screen that allows you to select who gets invited from the Event Invitee list.

Copyright Natural Sapphire Company © 2016

Event Object Structure:

Properties:

Event Name

Event Type

Date and Time

RSVP by Date

[Invitees]

RSVPs

Description

Location *This refers to the section/s of the US Office where the event will be held*

{Invitation} *Should be editable from the Event Description screen and should allow for an upload of a JPG or HTML file that will correspond to an email that will be sent out*

From here a new Event will have its properties set, and we can define who the invitees are. (Note: The type will determine who is prioritized on the invite list and who gets auto-added)

Event Detail View

Mockup:

Ongoing Details

Summary of Form Functionality

The forms that we will generate and host for RSVP handling will serve as a means of linking the invitees to their status.

The structure of the form and what the necessary fields are should determine what data gets stored for each invitee. This means that once the fields are set for a given form they cannot be updated, or if they are updated Null values will have to populate for any invitees that have already responded.

Also; might want to add a *Guests Enabled* feature that allows for a limited number of additional guests that the Event Creator can define. *Note: This would have to be uneditable after the fact*

Please note: Some of the fields will be to verify the invitee when they access the form

Standard Template Fields

- First Name* [use to verify]
- Last Name* [use to verify]
- Email Address* [use to verify]
- RSVP Status*
- Additional Comments (Character Limited 150 char.)

If Guests Enabled

- Bringing Guest (y/n)

Vendor/Trade Events Template Fields

- First Name* [use to verify]
- Last Name* [use to verify]
- Email Address* [use to verify]
- Company Name
- Job Title
- RSVP Status*
- Additional Comments (Character Limited 150 char.)
- Dietary Restrictions

If Guests Enabled

- Bringing Guest (y/n)

Office Events Template Fields

- First Name* [use to verify]
- Last Name* [use to verify]
- Email Address* [use to verify]
- RSVP Status*

If Guests Enabled

- Bringing Guest (y/n)

Customer Events Template Fields

- First Name* [use to verify]
- Last Name* [use to verify]
- Email Address* [use to verify]
- RSVP Status*
- Dietary Restrictions

If Guests Enabled

- Bringing Guest (y/n)
